

Teamwork Reflection

Introduction

As someone without a strong computer science background, I received tremendous support from my teammates throughout this project. Despite the challenges and complexity of the task, we successfully collaborated to deliver a group presentation. I deeply appreciate everything I have learned in this class and the unwavering support of the teaching assistants. Moreover, I genuinely enjoyed working with this team and value the experience we shared.

Peer Review

Javidan Karimli

Positive attributes

1. Demonstrates advanced technical expertise in Data Engineering, effectively helping the team organize and structure the entire project process.
2. Supportive and considerate towards teammates with less technical backgrounds, showing kindness and strong communication skills.
3. Dedicated to achieving perfection and consistently seeking excellence. I have no doubt that he will be successful in his future career.

Areas for improvement

1. There was a bit of initial uncertainty regarding the meeting topics during the early stages of our project. Enhancing the efficiency and clarity of our meetings could contribute to better task management and overall project coordination.
2. I am impressed by his strive for perfection and meticulous attention to detail. While thoroughly organizing each step and aiming for perfection can be valuable, it may be more efficient to prioritize other aspects of the project under tight schedules.

Ramil Mammadov

Positive attributes

1. Demonstrates strong communication skills, making collaboration smooth and efficient.
2. Friendly and approachable, making him a reliable and pleasant teammate to work with.

3. Skilled at gathering new information and conducting thorough research.

Areas for improvement

1. It would be great to hear more of his suggestions and thoughts during discussions, as his input is valuable to the team.
2. He collaborates well, and I believe he could further contribute by sharing more of his leadership skills within the team.

Jennifer Li

Positive attributes

1. Jennifer excels at managing tasks and demonstrates excellent skills in product management.
2. She is patient and proactive, always asking questions at the right time to ensure clarity.
3. Jennifer is a kind and supportive team member, consistently striving to improve efficiency.

Areas for improvement

1. It might be helpful for Jennifer to dedicate some time to enhancing her technical skills, which could further complement her management expertise.
2. Jennifer helped us by creating a shared Excel file and sending us the meeting link. I think it would be easier for the team to stay updated if we could use a shared drive or email to track all discussions.

Feedback Session Outcome

This final project brings together everything we've learned in the data engineering class this semester, making it an invaluable hands-on experience. Everyone contributed their knowledge and skills to this project, and completing such a well-designed application gives us a true sense of achievement.

Throughout this journey, we not only practiced applying our learning to a real-world project but also developed teamwork and collaboration skills essential in a data engineering team. This project offered us a new perspective on the collaboration techniques shared by our

professor, and it highlighted the importance of working together effectively. During discussions, everyone put in their best effort to propose and refine solutions, and we encouraged open feedback to help each other grow for the future.

Lastly, I want to express my sincere gratitude to my teammates, professor, and TAs. Thank you for your unwavering support and guidance throughout this course.
